Summary

I'm 31 years old looking to transition my career into the tech industry. Every job along my path has seen me outperform expectations and rapidly ascend to a highly important employee. I take pride in the fact that every boss I've worked for has told me how much of a loss it will be for me to move on from their company. If I can get my foot into the door of your company in any way possible you will instantly get a highly motivated employee always looking to improve himself and the company he works for. Highly work minded with the only goal during my working hours to get as much done as possible, in the most efficient manner, and to the highest standards. I know my resume isn't as decorated as others, but my mindset and initiative are unmatched. I've been going through life solo since I was a teenager, always working to make ends meet. I'm ready to find a career and an employer that can ease my burdens and let me thrive in life. Please call my current employer to inquire about me, I'm worth the investment.

Work Experience

Warehouse Overseer - His Glassworks (2022 - current)

Maintain product, raw materials, and customer databases to calculate pricing and lead time data for an online retailer. Dynamically link our backend databases to the company website to display current inventory amounts, expected shipping pricing and transit time. Cameraman and chief editor of educational videos posted on the company website, as well as social media posts.

Paraprofessional - Community Companion Health Care (2019 - 2022)

Wrote daily medical reports for a collection of thirty clients uploaded to the company's database. Tracked prescription medication usage and supply. Organized medical checkups and therapist visits. Received medical training to perform CPR, injections, and psychological evaluations in high danger situations.

Market Manager - West Court Food Center (2013-2019)

In house database programming of label systems with product IDs, pricing, descriptions, and dates. Maintained and operated third party devices to communicate and upload shipment requests with suppliers. Traveled between four locations weekly to track store inventory and calculate upcoming supply expectations.

Education

Asheville-Buncombe Technical College (2023 - 2025)

Gained hands-on experience with core programming languages while collaborating with peers and teachers to create webpages, programs, databases, and manage git repositories. Languages studied include Python, Java, MySQL, HTML, PHP, CSS, and JavaScript. Graduated with National Honor Society honors and a Certification in Software Development.

McDowell High School (2009-2012)

Graduated with National Honor Society honors. Worked as a lab technician to troubleshoot equipment throughout the school such as teacher computers, student laptops, projectors, and virtual meeting environments.
