Professional Summary

Full Stack Developer with 15+ years of experience building scalable, secure, and maintainable web applications. Skilled in modern frameworks (Laravel, React, Node.js), cloud platforms (AWS, GCP, Azure), and API design (REST, GraphQL). Adept at modernizing legacy codebases, improving performance, and delivering clean, testable solutions. Strong collaborator who thrives in agile environments and drives long-term product success.

Core Skills

- **Languages & Frameworks:** PHP (Laravel, Symfony, WordPress), JavaScript/TypeScript (React, Node.js), Python, Java
- **Databases:** PostgreSQL, MySQL, MongoDB
- **APIs:** REST, GraphQL, OAuth2
- **DevOps & Cloud:** Docker, AWS, GCP, Azure, CI/CD pipelines, Linux administration
- **Tools:** Git/GitHub, Agile/Scrum, Testing (PHPUnit, Pest, Integration/Feature Tests)

Professional Experience

Full Stack Developer / Software Ronin

ThothProcess – Remote | Dec 2017 – Present

- Modernized legacy PHP applications by refactoring into modular Laravel services, cutting production issues by 40%.
- Built and maintained scalable REST & GraphQL APIs, integrated with custom React frontends for performant UIs.
- Migrated monolithic apps to Laravel + React stacks with zero-downtime deployments.
- Automated CI/CD pipelines and containerized environments with Docker, reducing release times significantly.
- Strengthened backend security with OAuth2, input validation, and static analysis tools.

Software Consultant (Full Stack)

Constructique – Lee, MA | Jan 2019 – Jun 2024

- Refactored legacy WordPress plugins with modern PHP (PSR-12, OOP), reducing support requests by 40%.
- Developed secure RESTful endpoints and React-based admin interfaces.
- Migrated jQuery-based tools to React with incremental rollouts for smooth adoption.
- Improved plugin security with nonce checks, capability validations, and code audits.

Web Application Developer

Alliance for a Healthier Generation – Portland, OR | Jul 2016 – Nov 2017

- Deployed containerized environments on AWS, streamlining onboarding and backend reliability.
- Built automated migration workflows and deployment scripts, reducing downtime by 75%.
- Maintained clear documentation of system architectures for long-term maintainability.

Software Engineer / Developer

Various Companies (Songspace, DealDay, Croscon, Atlas Technology, City of Springfield, Sotheby's, Web Solutions, Lenox Softworks) | 2003 – 2016

- Designed APIs, built scalable full stack systems, and optimized performance across multiple industries.
- Modernized legacy systems, introduced automated testing, and integrated modern frameworks.
- Enhanced user experiences by improving frontend UIs (React, Backbone.js, JavaScript).
- Delivered reliable backend services supporting high-traffic apps and enterprise integrations.

Education

Bachelor of Science – Computer Science

Springfield College – Springfield, MA | 2003
