Education

B.S. Computer Science
Northern Illinois University

NuCamp
Python w/ Devops

Generation USA
AWS Cloud Practitioner Certification

Expertise

- Java
- Selenium
- Cucumber
- Jira Workflows
- Documentation
- Confluence

Experience

February 2023 - present
Bellomy
DevOps Quality Control Specialist

- Develop and maintain automated test scripts using Selenium and Java to verify the functionality and quality of software applications.
- Implement BDD practices using Cucumber, writing feature files and step definitions that serve as test cases with natural language descriptions.
- Create and maintain test plans and test cases in Jira, ensuring comprehensive test coverage.
- Execute automated test suites, record test results, and report defects in Jira.
- Generate test reports, share them with the team, and communicate test progress and results effectively.
- Ensure test data and test resources are available for automated test execution.
- Collaborate with cross-functional teams, including developers and product owners, to understand requirements and ensure test cases align with project goals.

August 2022 - November 2022
Comcast
DevOps Engineer

• Design, implement, and maintain AWS Step Functions workflows to orchestrate and automate serverless applications or microservices.
• Analyze experiment results and collaborate with development teams to implement necessary improvements.
• Develop and maintain serverless applications using the AWS SAM framework, leveraging SAM-CLI for local testing and debugging.
• Participate in code reviews to ensure that serverless applications and infrastructure as code (IaC) templates meet coding standards, security requirements, and best practices.
• Integrate serverless applications and AWS infrastructure into the CI/CD pipeline, ensuring automated testing, deployment, and continuous integration.
• Collaborate with DevOps and CI/CD teams to streamline the release and deployment processes.
